

1037T

Comforting aesthetics to provide enhanced level of care adapting to the growing needs of patients and caregivers, Midmark 1037T has been designed and configured to meet the evolving needs in the healthcare ecosystem.

Comfort your patients will appreciate

1037T, transfer chair with comforting aesthetics is designed to assist in reducing the risk of adverse events like patient falls and infection, while enhancing the patient comfort.

01 Headrest

1037T comes with a provision to mount cushioned head support, to provide enhanced comfort to your patients.

02 Stand assist armrests

To encourage correct positioning while ingress and egress, these swingable armrests are designed for better patient access.

03 Optimal patient comfort

Seat back and seat recline designed for optimal patient comfort. The backrest is inclined from the floor at 72° and the seat is inclined from the floor at 15°. This provides optimal sitting comfort and sliding out of the patient and prevents sliding of patient.

04 Swing in footrests

help reduce trip hazards by providing a clear path of patient ingress and egress. Foot-operated swing away functionality enhances access to the patient and closer positioning to beds or tables, and offer unobstructed access to the patients.

05 Integrated adjustable leg rests

Extendable leg rests for placements of calves to provide an additional comfort to patients with temporary or situational knee or foot support.

We are interested in growing relationship

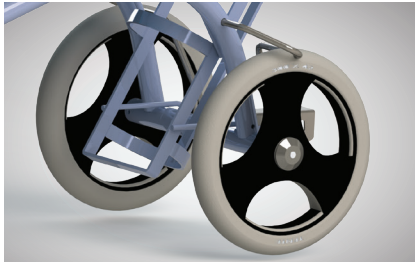

Better ergonomics to assist caregivers

Because of the well-placed action zones, there is no need for the caregiver to lean down anymore.

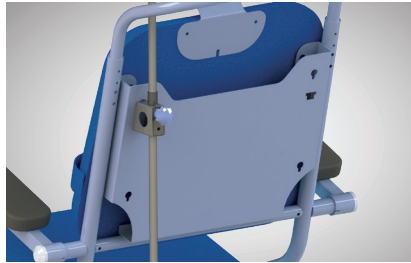

01 Push Handles

Allow caregivers to position their elbows at an ergonomic 90° ** angle during transport and accommodate caregivers morphologies.

02 Easy Maneuverability

To instill less force while steering, 300 mm* diameter rear wheels act as center of gravity for better patient handling.

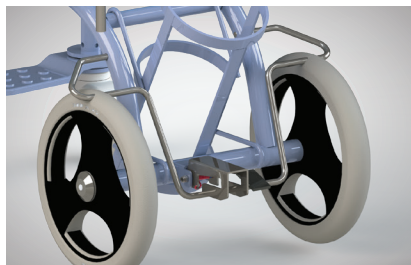

03 File Holder

Provision for storing patient reports and files at the seat back.

04 Avoid dust retention

Because of the flat or tubular surfaces avoid dust retention

05 One Touch Central Brake

To avoid bending and reaching one touch, foot operated brakes enhance the efficiency for caregivers

06 Durable and seamless design

Mono block mild steel frame reduce the risk of rust that is difficult to clean. This simple design make cleaning quick and easy.
